Building, Nanhu Campus,
China University of Mining
and Technology
Xuzhou, Jiangsu, China,
221116

Target Group

Senior undergraduates majoring in mining, environment, geo-technical engineering and mineral processing

Program Description

The summer school is initiated on the basis of the successful operation of the 2014 International Student Summer Camp at CUMT. This year, we focus much more on course study in green mining, mining safety and geology. In the meantime, participants will also have an opportunity to network with students across the world and learn about glorious Chinese culture and history.
