

## Newsletter der Graduierten- und Forschungsakademie

Dear PhD students,

with the beginning of spring, we send you news from the Graduate and Research Academy about our accessibility, our courses and other offers for PhD students at TU Bergakademie Freiberg.

As always, we are open to requests for continuing education offerings, questions about your doctoral process, and have open ears for your topics.

Best regards  
Dr. Theresa Wand

---

### Contents of the newsletter

- Course program
- Farewell for doctoral students
- EURECA-PRO Doctoral Studies
- international science conference: Building Bridges for the Next Generations
- Coaching training D1RECTIONS

### Course program

With the start of the summer semester, GraFA offers as usual workshops in the areas of Scientific Work, Basic Program Promotion and Leadership, Management and Career. The IT restrictions also have an impact on our course organization and the usual registration mask is no longer available. From now on, the overview of the courses and the registration will be done via our GraFA blog, which you can reach here: <https://blogs.hrz.tu-freiberg.de/grafa/workshops/>.

If you have any questions or problems with the registration, please feel free to write an email to [organisation@grafa.tu-freiberg.de](mailto:organisation@grafa.tu-freiberg.de).

The following topics are planned:

- Presenting in English for Scientists (04. April to 02. May 2023)
- Stipendienbewerbungstraining (20./21. April 2023)
- Projektmanagement im wissenschaftlichen Kontext (04. May bis 12. May 2023)
- Compliling Academic Paper (08. May bis 05. June 2023)
- Design of Experiments (15./16. June 2023)

Other courses are in preparation and will be announced via Unirundmail.

## Farewell ceremony for doctoral students

The ceremonial farewell of the doctoral and post-doctoral graduates of 2023 will take place this year on 04 November 2023 in Alte Mensa. If you are in the process of completing your doctorate, make a note of this date now. With this festive event, TU Bergakademie Freiberg thanks both its doctoral and post-doctoral graduates for their achievements in research and teaching during their doctorate or post-doctorate, as well as the supervising university teachers who have supported the graduates with professional advice. To conclude the day, TU Bergakademie Freiberg invites you to the University and Graduates Ball.

## EURECA-PRO Doctoral Studies

The EURECA-PRO Doctoral Studies is now open to applications from PhD student at TU Bergakademie Freiberg.

The EURECA-PRO alliance consists of nine universities across eight European countries that have come together to create **The European University on Responsible Consumption and Production**. Through new courses, activities and joint study programmes, EURECA-PRO aims to be the global educational hub and interdisciplinary research and innovation leader in this United Nations Sustainable Development Goal.

To reach this objective, EURECA-PRO has opened the **Responsible Consumption and Production Doctoral Studies**. This exciting series of courses and opportunities offers PhD Students the chance to:

- Expand your research potential through accessing research facilities at our partner universities
- Develop your scientific network and collaborate internationally
- Gain new research, innovation, language and transferable skills
- Explore our partner universities at summer schools, conferences, colloquia and other exciting events
- Learn about Responsible Consumption and Production and what it means for your research
- Participate in our bespoke international mobility programme for Doctoral students, the PhD Journey

With permission from your supervisor, any PhD student at TU Freiberg with a topic relating to **Responsible Consumption and Production** can apply to join this programme.

**On Thursday the 20<sup>th</sup> of April, an open to all Introductory Meeting to the Doctoral Studies will be held. Come along to learn more about what EURECA-PRO can do for you. Please register here:**

## international science conference: Building Bridges for the Next Generations

As a neutral mediator, science has always been able to build bridges and cross borders – whether they are geographical, disciplinary or societal. In times like these, it is more important than ever to strengthen already existing connections among international partners in Central Europe and to build new alliances among the younger generations. That is why the Free State of Saxony initiated the international science conference Building Bridges for the Next Generations, which will be organized by the Helmholtz-Zentrum Dresden-Rossendorf (HZDR).

This May, scientists from Poland, the Czech Republic, Germany and other Central and Eastern European countries will come together and discuss how to solve urgent research questions especially in the areas of Health, Information Technology/AI and Energy & Climate. They will have the opportunity to exchange ideas with international experts from public offices as well as partners from the industry and start-up scene.

The HZDR cordially invites you to participate in this dialogue!

## Coachingausbildung D1RECTIONS

### Coaching training D1RECTIONS

In the summer semester of 2023, doctoral students will have the last chance to be trained as a group coach for students as part of the TU Braunschweig's D1RECTIONS project. The training includes two virtual training weekends on May 20/21, 2023 and October 7/8, 2023. In the winter semester, the acquired skills and tools will be used to support students in addressing their own career, focus areas in their studies or personal strengths & weaknesses and potentials.

Registration is possible here:
