

Survey on Geodata Requirements

Preliminary Results

Susanne Rahner & Sören Klünder

In the course of the Survey 147 questionnaires were sent out,
28 of which were completed and returned.
19% Reply rate

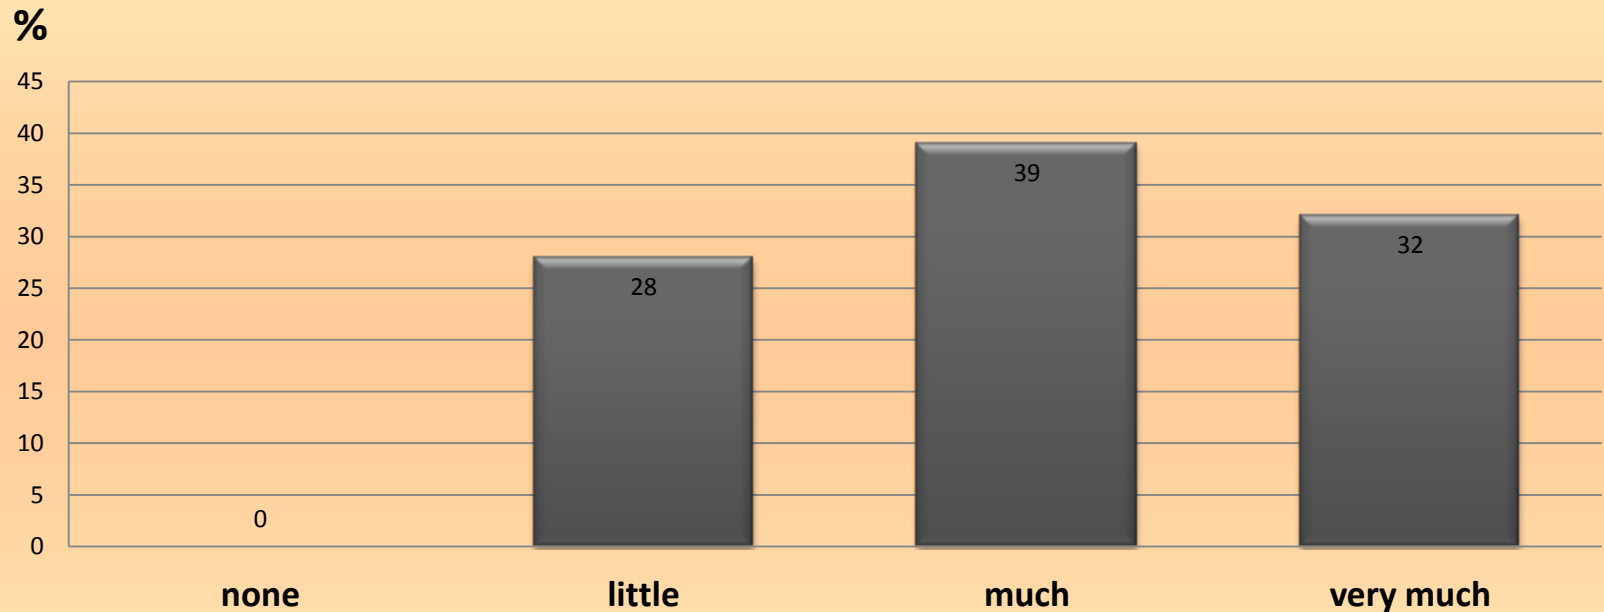

- Question 1:** Do you have experience in using geoinformation regarding Habitat Directive (Natura-2000)?
- Question 3:** In how many of your projects (in %) do you use geoinformation services (methods, tools, data) regarding Habitat Directive (Natura-2000)?
- Question 8:** Which experiences have you gained with user rights regarding Habitat Directive (Natura-2000)?
- Question 9:** Which experiences have you gained with availability of geodata regarding Habitat Directive (Natura-2000)?
- Question 12:** In which data formats do you have geoinformation regarding Habitat Directive (Natura-2000)?
- Question 13:** Which medium do you use to send information?
- Question 15:** Which experiences do you have with data quality regarding of Habitat Directive?

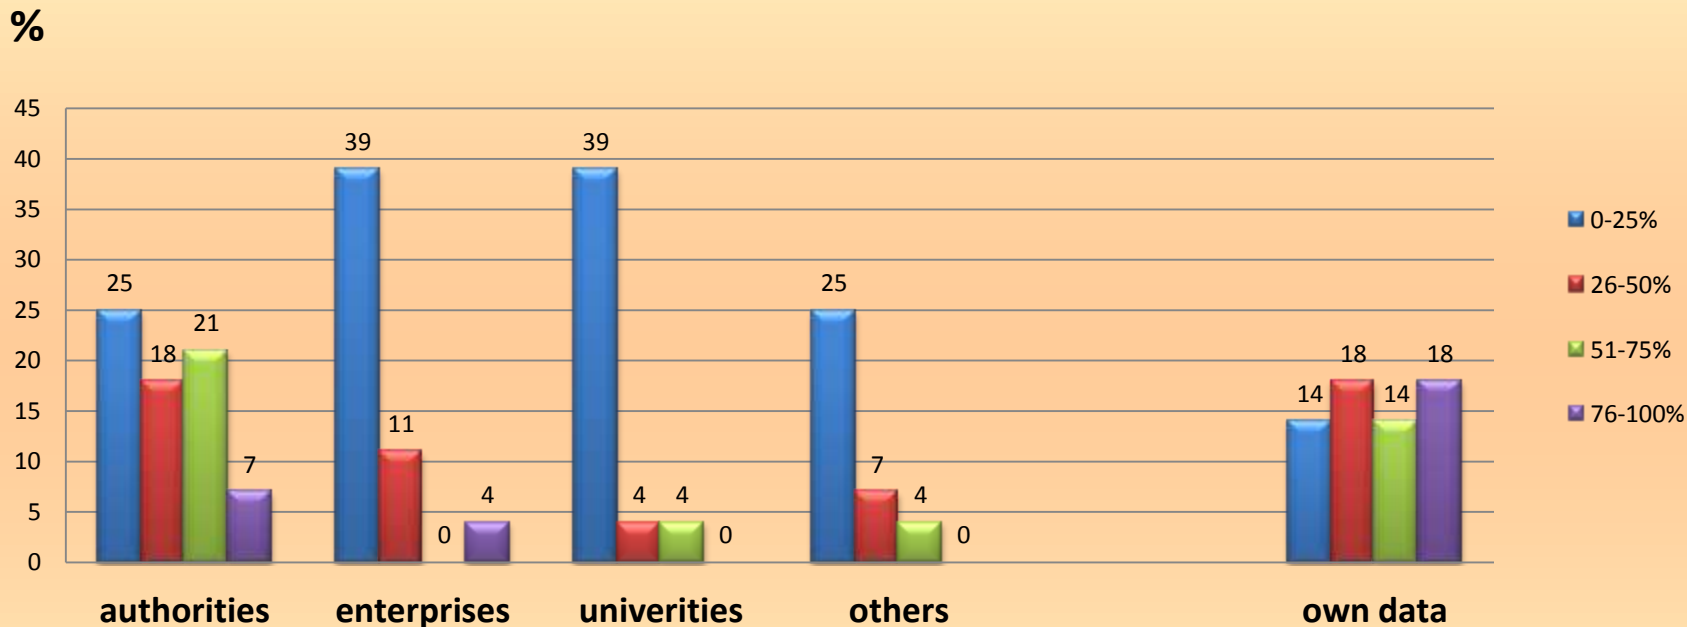

- Question 16:** What sort of main data deficiency do you encounter (if you encounter deficiencies) regarding Habitat Directive (Natura-2000)
- Question 17:** Which experiences do you have with compatibility and different Data Formats regarding Habitat Directive (Natura-2000)?
- Question 19:** Which data bases do you use (i.e. MS Access, dBase, MySQL, dBase, Oracle etc.) regarding Habitat Directive (Natura-2000)?
- Question 22:** How up to date are your data regarding Habitat Directive (Natura-2000)?
- Question 24:** Which priorities (1-6, 1=very important, 6=least important) would you like to have in connection to geodata regarding Habitat Directive (Natura-2000)?
I.e. availability, up-to-dateness, compatible formats, Twitter, Facebook, Xing

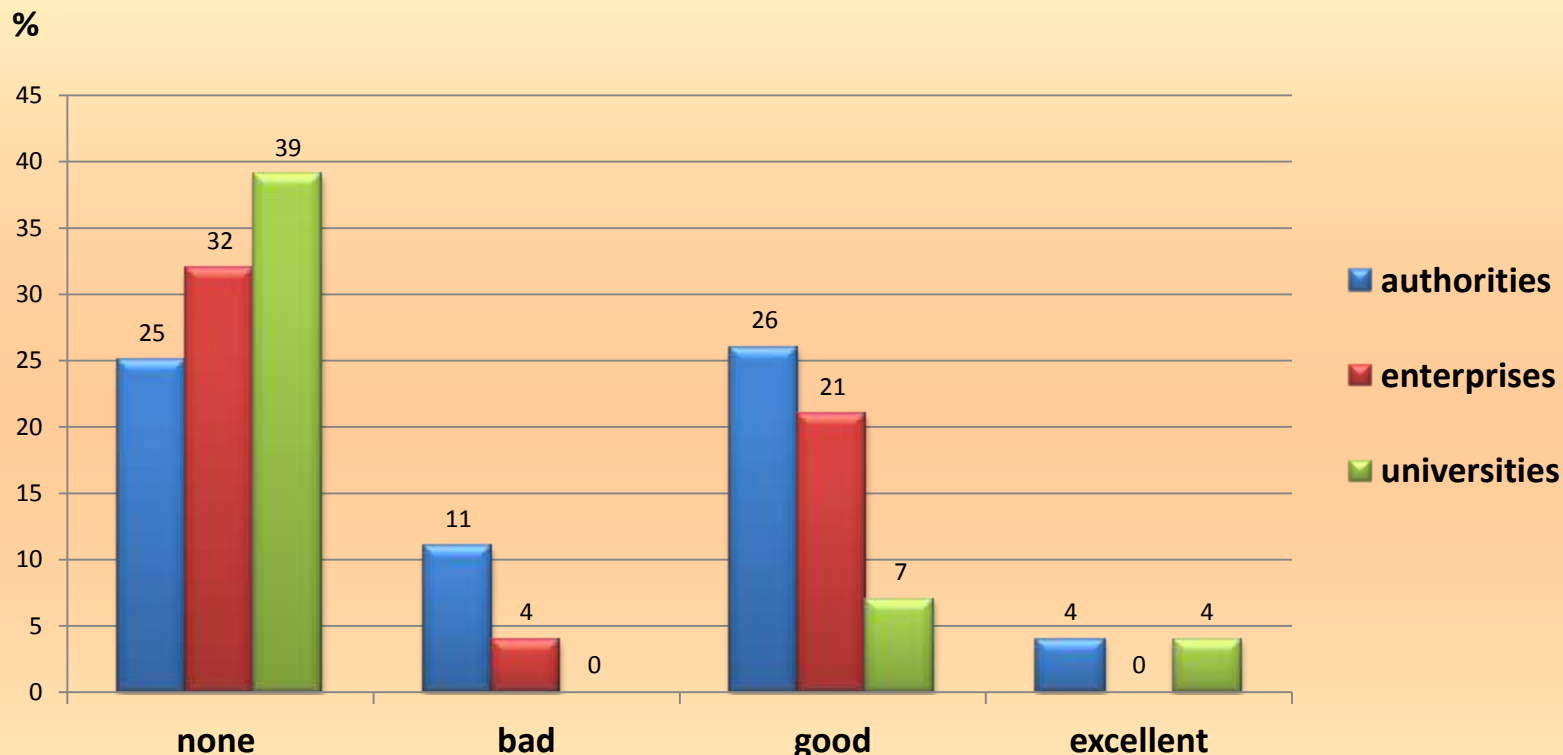

Question 1: Do you have experience in using geoinformation regarding Habitat Directive (Natura-2000)?

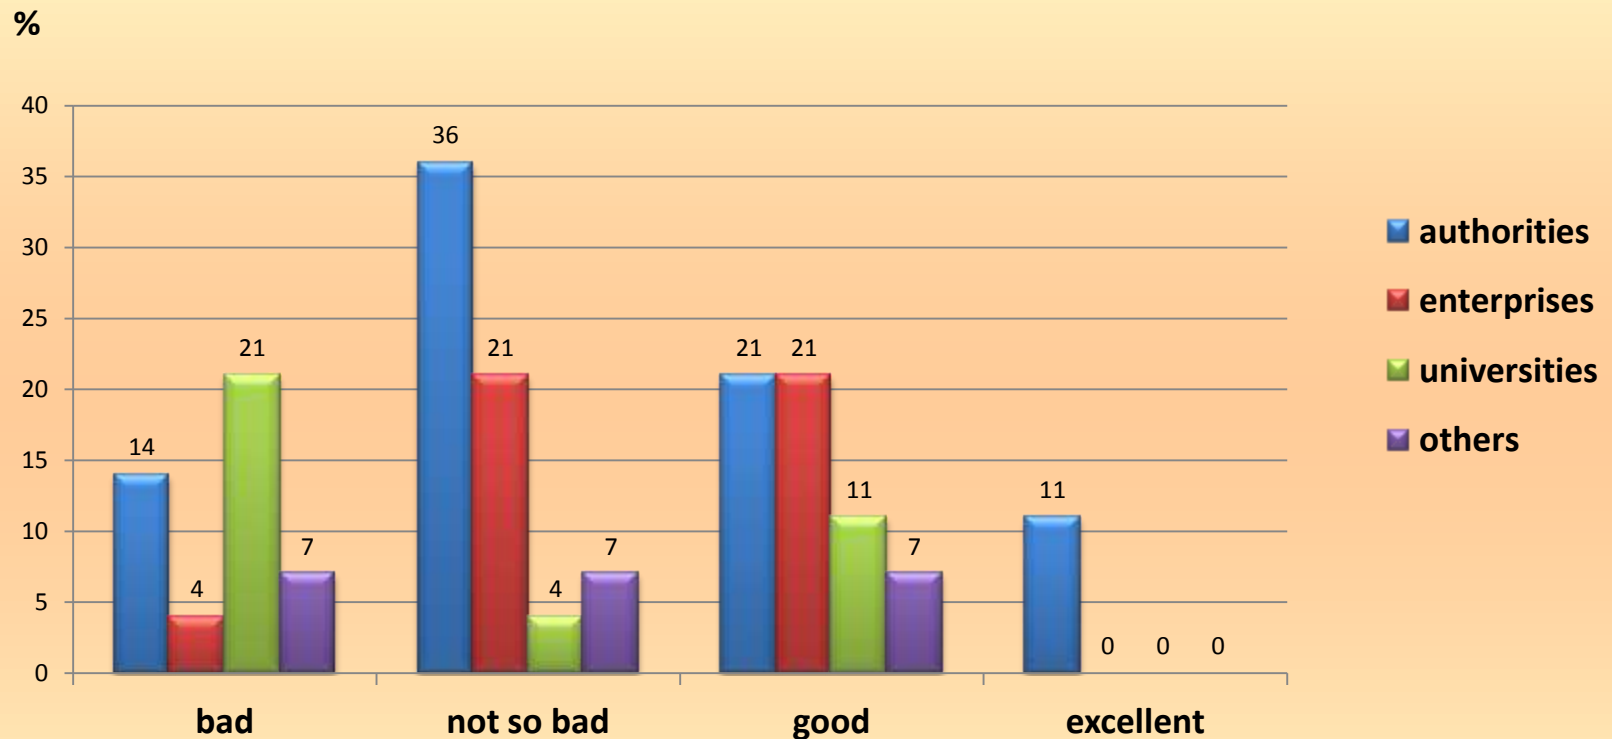

Question 3: In how many of your projects (in %) do you use geoinformation services (methods, tools, data) regarding Habitat Directive (Natura-2000)?

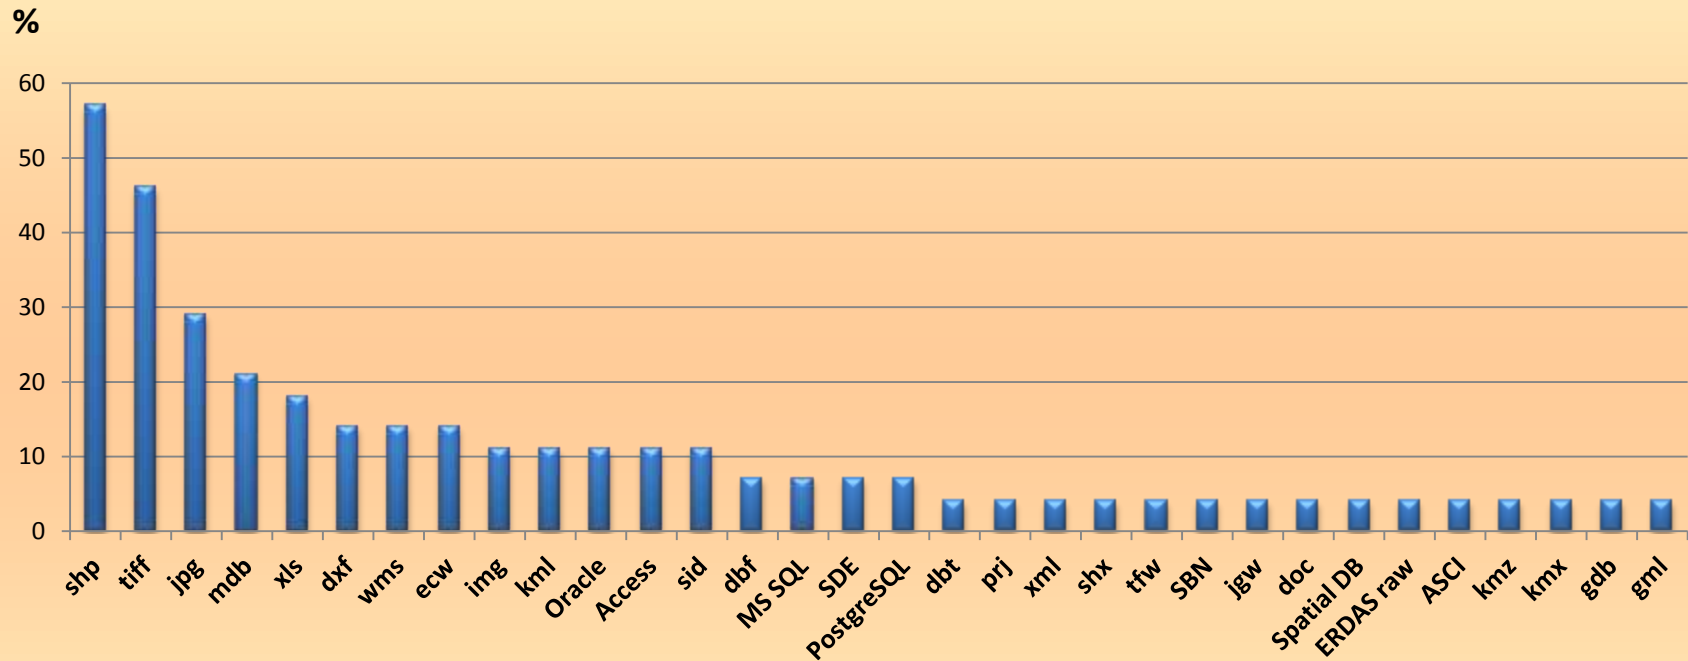

Question 8: Which experiences have you gained with user rights regarding Habitat Directive (Natura-2000)?

Question 9: Which experiences have you gained with availability of geodata regarding Habitat Directive (Natura-2000)?

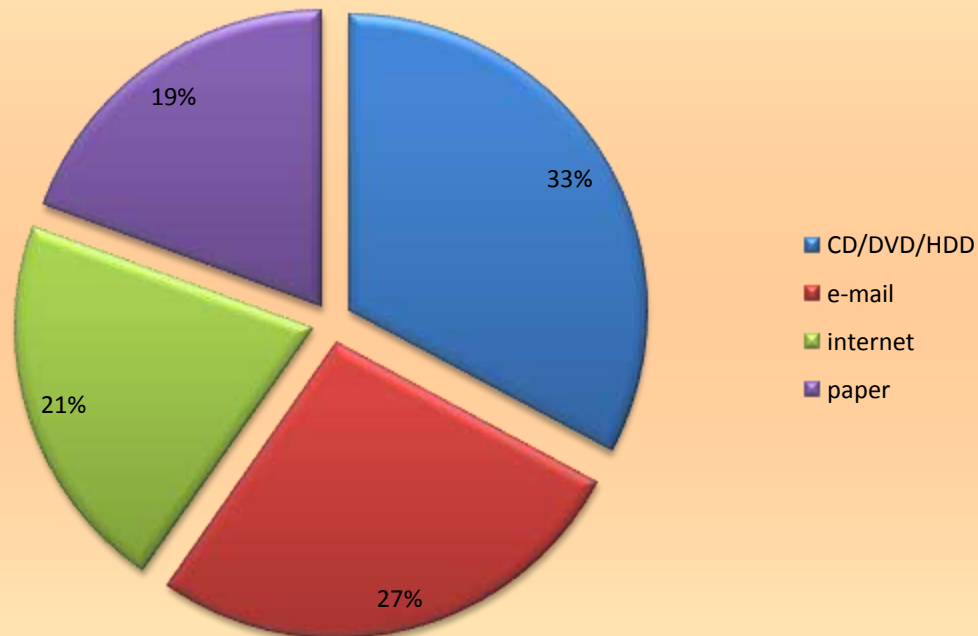

Question 12: In which data formats do you have geoinformation regarding Habitat Directive (Natura-2000)?

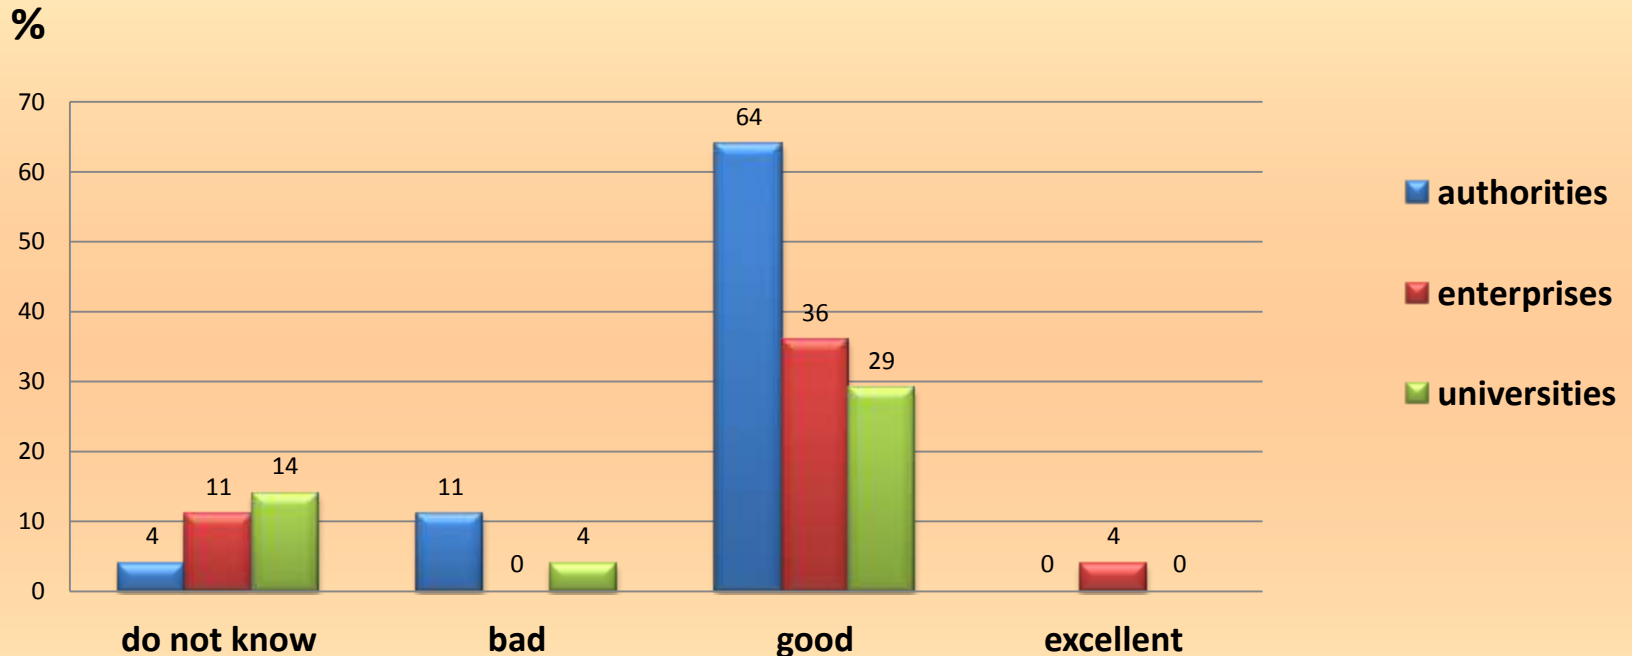

Question 13: Which medium do you use to send information?

Question 13: Information distribution

Question 15: Which experiences do you have with data quality regarding of Habitat Directive?

Question 16: **What sort of main data deficiency do you encounter (if you encounter deficiencies) regarding Habitat Directive (Natura-2000)**

Most often mentioned:

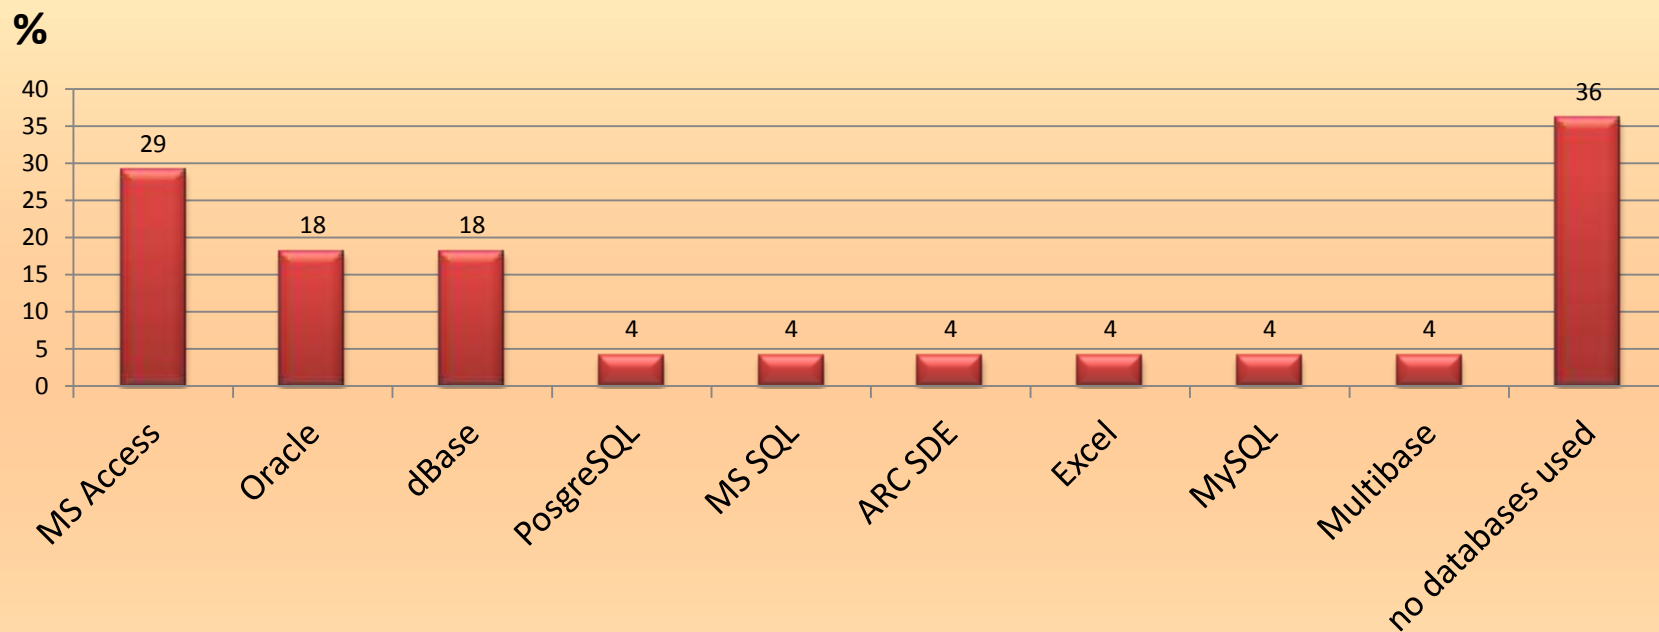

- **Up-to-dateness**
- **inaccuracy in data**
- **lack of uniformity and compatibility in data**
- **missing or insufficient metadata**
- **usage of different reference systems**
- **scale problems**
- **etc.**

Question 17: Which experiences do you have with compatibility and different Data Formats regarding Habitat Directive (Natura-2000)?

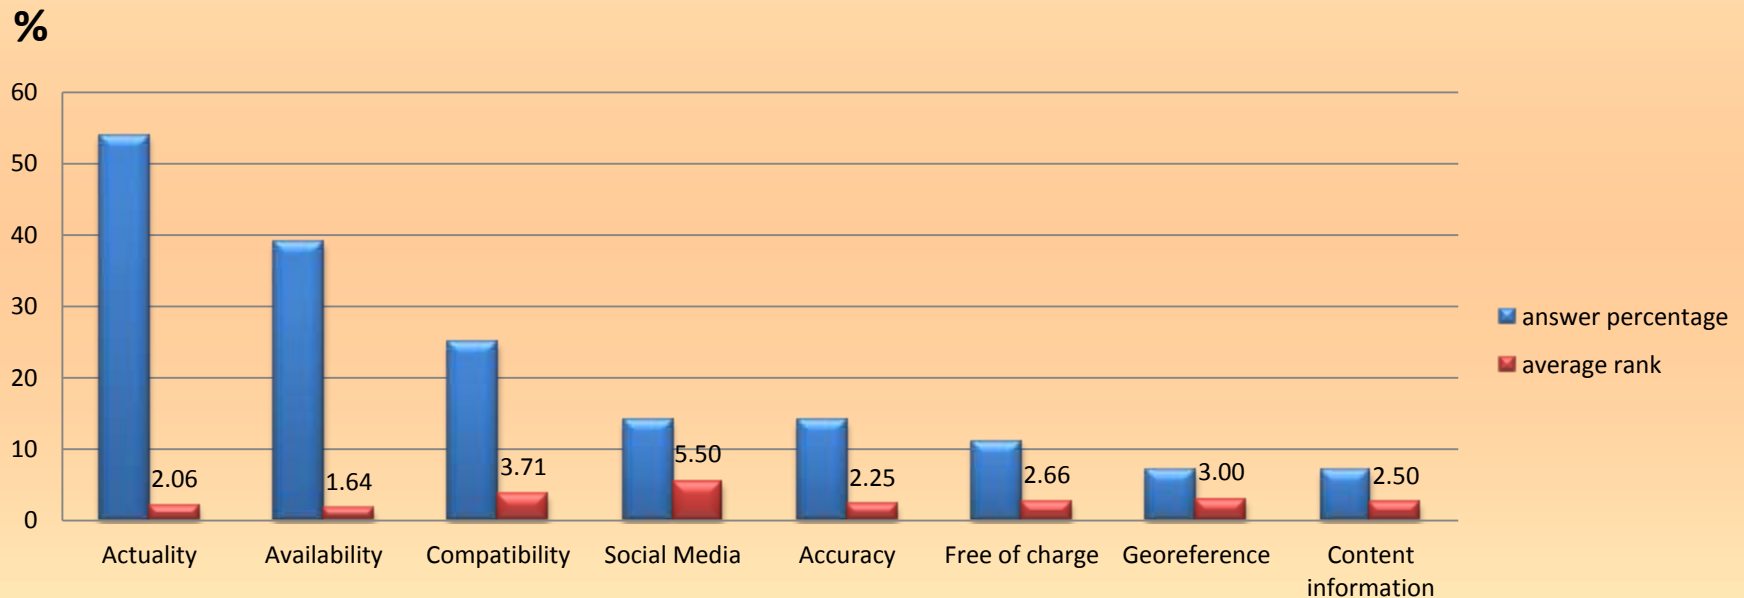

Question 19: Which data bases do you use (i.e. MS Access, dBase, MySQL, dBase, Oracle etc.) regarding Habitat Directive (Natura-2000)?

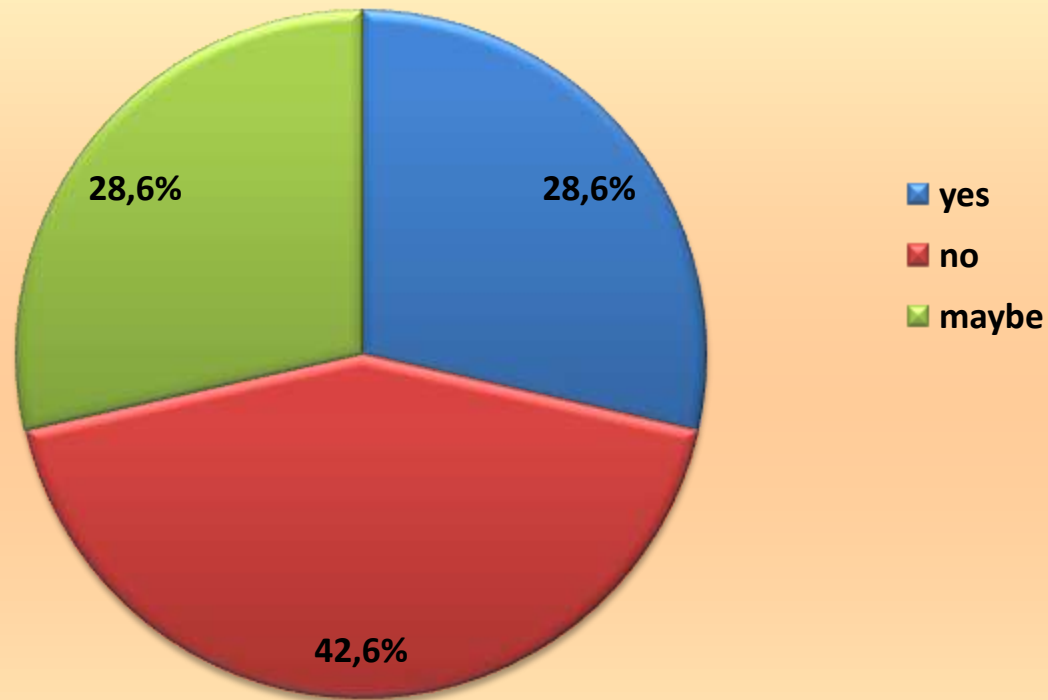

Question 22: How up to date are your data regarding Habitat Directive (Natura-2000)?

Question 24: Which priorities (1-6, 1=very important, 6=least important) would you like to have in connection to geodata regarding Habitat Directive (Natura-2000)?
I.e. availability, up-to-dateness, compatible formats, Twitter, Facebook, Xing

Interest in EU-projects

Results:

- Some questions should have been asked stricter
- Very hard to enforce exact answers
- Some answers with statistical relevance
- Some answers yet to be interpreted

Questions:

- Shall we continue and enlarge the questionnaire audience?
- Is this result a value for the field and Data experts?
- Can we derive strategic and technical conclusions from that?

Maybe we should have a discussion with the consortium partners in a workshop or in some face to face meeting?

Thank you for your attention!
